

CONNECTIONS

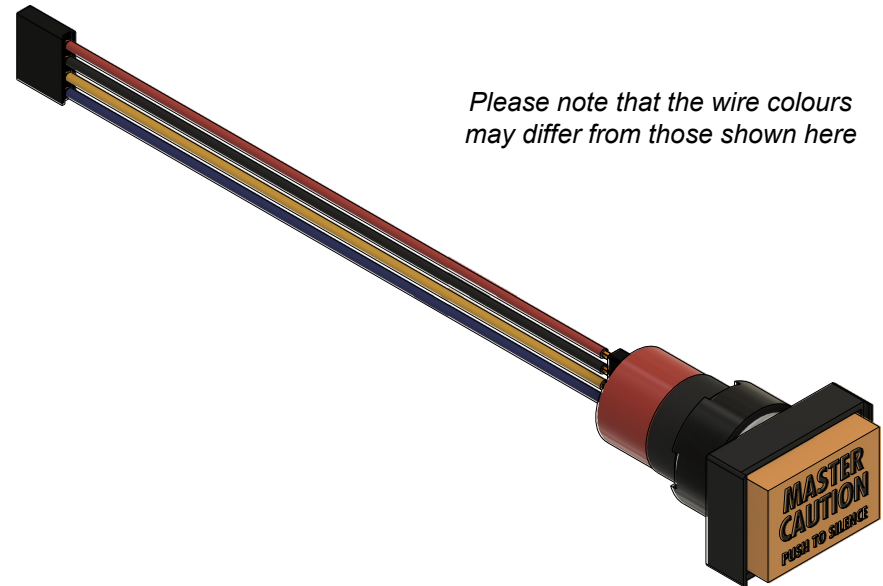

RED Wire - LAMP
BLACK Wire - BUTTON
YELLOW Wire - BUTTON
BLUE Wire - LAMP

Our Illuminated Glareshield Pushbuttons are shipped with a one-metre length of 4-strand wire that has a 4-pin female header attached.

This header allows for the glareshield pushbuttons to be plugged directly into the Ruscool Annunciator Controller (if that is the controller you are using).

The lamp is not polarity conscious, so it doesn't matter which way around the plug is fitted.

Please note that the wire colours may differ from those shown here
